Hello L4000 sailor,

Below are some simple instructions of where to put things when you drop your boat off in case we are not here.

Please make sure that everything - trailers, trolley wheels, kit bags etc are clearly **labelled**.

**Please take the spreaders off the mast** and leave the mast lying on top of each boat.

Please **tie the front of your boat** to its trolley although we tie the whole lot down to the trailer.

Please tie your **foils, boom and sails** securely into each boat.

It is more than likely that the **trolley wheels** will need to come off so please make sure that they can!

**Kit bags** can travel in the back of the van but will need to be put into a shed until we load. Just before you turn into the field there are a couple of sheds on the left and one has a combination padlock, number **505**. This is where you will need to put your bag to make sure it goes with us. Please make sure they are labelled with class, sail no. and name (just in case the previous/next class delivered also have their kit bags in there!)

Please could you put the **boats** neatly around the edge of the field and take them off their trailers.

The **trailers** can stay here until you come back to pick the boats up but please could you stack them all up together.

It is best for everybody to take their **trailer boards** and any **spare straps** home with them so they don't all get mixed up.

If you have any queries please do not hesitate to contact us.

Many thanks.

Ian & Pippa
